

# cypher **2**

(Ultra-Portable Erasure Kit)

The second-generation Cypher is a customizable, mid to high-volume, portable erasure system for applications where throughput is needed and budget is limited. Everything from high throughput and direct-attach erasure capabilities to the carry-handle and available deployment kit make Cypher2 a perfect platform for small-scale mobile data erasure operations.

Customizable configurations to erase hundreds of terabytes of information on multiple devices across multiple protocols, simultaneously.

## Configurable to Support

- Fibre Channel
- SAS
- SATA & IDE
- SCSI

- Dozens of loose drives or up to 16 arrays of same or mixed drive type, all at once
- Managed by connecting keyboard, mouse and display, or remotely over the network
- **x-ponent compatible**
- Available deployment kit, including hard travel case, roll-out keyboard, & touchscreen monitor
- NIST Clear and Purge **compliant**

### x-ponent

Expansion accessories for all drive types that add more tool-less loose drive connections. Compatible with external SAS connections on RED, PEEK and Cypher products.

## OTHER SOLUTIONS

portable

rackmount
