End of Life Data Destruction:

Full Range of Non-Destructive and Destructive Solutions

DestructData specializes in enterprise level end-of-life media sanitization solutions. As pioneers in the field, we have developed a products and services that matches any data destruction scenario. Our high-volume, high value custom data erasure systems are consistent with recycling and re-use programs, while a wide range of physical destruction options is also available.

Compliance:

Meeting Privacy Regulations with Total Confidence

Whatever your data storage scenario, DestructData offers a range of solutions corresponding to NIST 800 - 88 guidelines. Our extensive experience dealing with privacy legislation is your assurance that specific destruction methods are consistent with FACTA, HIPAA, HITECH, Sarbanes-Oxley, GLBA, DATA and other regulations.

Enterprise: Maximum Throughput and Value

We offer the most powerful moderate-to-ultra high-volume erasure platforms in the business. Engineered for maximum throughput, our turnkey solutions provide support for all protocols, including Fibre Channel, SCSI, SAS, SATA, IDE, USB and FW. Configured to your precise specifications, platforms for 8, 16, 24 or 48 drive scenarios are ready to ship, as well as portable direct-connect systems.

EQUIPMENT SALES

EQUIPMENT RENTALS

EQUIPMENT LEASING

RED

- Certified, compliant erasure
- Unlimited-use license with no per-drive fees
- Centralized reporting for seamless audit trail

Already Know How to Get There!

Recycle / Re-Use:

Environmentally & Financially Sound Policy

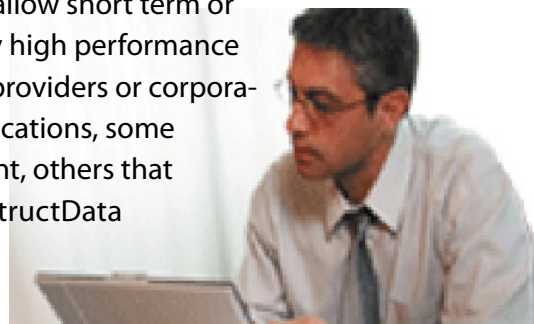

Consistent with current trends in end-of-life data disposal practices, our verifiable data erasure solutions assure compliance, while promoting both environmental responsibility and maximizing asset value. Hard drives may be reused, recycled for their materials or donated to charities with confidence.

Flexible Placement Options:

High End Equipment Access for Long or Short Term Users

Our flexible rental programs allow short term or lower volume users to deploy high performance equipment. Ideal for service providers or corporations that have multiple applications, some requiring long term placement, others that are short term projects. DestructData offers placement options to fit any requirement.

On-Site Erasure:

Ensure Chain of Custody Security

DestructData, Inc. will implement professional data erasure services in your data center or office. Delivered direct or through network partners, our on-site services are highly cost effective on a per drive basis. Because our technology allows us to process high volumes of drives simultaneously, we can do in a day what our competition does in a week.
