Play DVD Splitting and DX-CD2™ Operation

Grasp DVD disc firmly approximately 1/2 inch from the edge. Insert DVD disc into groove of the DX-DVDm™ DVD Splitter as shown. Firmly press DVD disc into DX-DVDm™ until DVD disc layers are penetrated (The DX-DVDm™ may have to be rocked back and forth slightly to penetrate the DVD layers). The DX-DVDm™ will penetrate approximately 1/2 inch.

With the data layer facing the user (this allows a visual aid of the splitting process), carefully rotate the DX-DVDm™ completely around the circumference of the DVD disc as shown.

Carefully work your fingers inward between the two pieces of plastic and rotate the disc until the two pieces are separated. Care should be taken not to crack or break either DVD disc layer.

Once DVD disc is split, the information layer(s) are exposed. Many times information can remain on both halves. Place the lower half of the DVD disc on top of the upper half. This renders the information layers on the outside.

Place in DX-CD2™ and grind the DVD disc. Remove, flip over, reinsert into the DX-CD2™ and grind the DVD disc a second time.

Data is now completely removed from the DVD disc.

Recycle for a Greener Earth

Earth as seen from Apollo 17

The DX-CD2 is designed to scrape the data layer of a CD/DVD-ROM, CD/DVD-R, or CD/DVD-RW disc thus making the information totally unreadable. The resulting process produces a clear polycarbonate disc; the residual ink and metals are collected in the dust bag.

Both the dust bag and the polycarbonate disc can be discarded in a normal trash container. However, an alternative recycling program is offered, which takes all discarded materials and recycles them for a cleaner environment.

In addition to CD and DVD polycarbonate disc material, Digital Data Destruction also recycles decommissioned hard drives, tape cartridges, and flash drives.

If you would like Digital Data Destruction to recycle your materials at no cost to you, except the freight to ship them to us, please collect your discs and any dust bags and send to:
